Construction Division

Construction claims involve a broad variety of losses ranging from the straightforward auto fleet exposure to complex property and liability project losses.

A proven system of control adjustment and centralized risk management provides for prompt, professional and cost-effective solutions to the construction industry.

At McLarens Canada our client is the **construction company**. Through our loss prevention, loss reduction and mitigation solutions, combined together with our specialized expertise in Insurance and Risk Management, we can provide comprehensive monthly management reports that may potentially reduce insurance costs.

All losses receive an immediate response time as provided by our control adjusting team approach. The best interest of the insured is to limit the number of policies triggered and establish the most streamlined method of on-site investigation and reporting. Ultimately we aim to lower loss ratios, insurance costs, and overall claims costs.

Working within the framework of a Third Party Administration Team, McLarens Canada in strategic partnership with the construction firm, broker, and insurer, utilizes qualified professional personnel to reduce the cost of claims from all risk exposures.

McLarens Canada TPA team tracks all losses for:

- CGL
- Builders Risk
- Wrap-Up Liability
- Contractors Block
- Automobile
- Equipment Losses

A collaborative reporting framework is used to aid in the tracking and administration for all strategic partners.

Effective Data Management: As a result of these innovative strategies within this field, loss ratios will be improved, leading to potentially lower insurance costs.

Risk Management: With high deductibles and self-insured retentions, which are the norm for large companies, cost containment is key. McLarens Canada immediately recommends any contractual indemnification available to the company.

Litigation Management: We emphasize the management of litigation by agreed objectives, such as early assessment, budget preparation, effective partnership with counsel, technically sound evaluations and strategic follow-through.

McLarens Canada offers a national presence to the domestic property and casualty insurance industry, and an International capability to provide for the claims adjustment needs of our clients on a 24-hour, 7-day a week basis.

As "Professionals on your team™", we will contribute to the overall reduction in costs of risk management, large losses and litigation management to the benefit of all.

Our Mission Statement

McLarens Canada is seen as the largest high quality and professional claims management firm in Canada, known for its technical expertise and integrity. McLarens Canada will maintain the strongest revenue growth rate of any adjusting service firm in Canada by focusing on geographic growth, new products and high quality. Its reputation for retaining long term, dedicated professional team members is something its clients have grown to rely upon.
